

***'Time Collection for your Mobile, Field, Remote Workforce' is the Latest On-demand Webinar
in WorkForce Software's Learning Series***

Livonia, Mich., September 19, 2007 – WorkForce Software, Inc., a leader in workforce management software solutions, is pleased to announce a free webinar for payroll and human resources professionals. During the month of September, WorkForce Software is hosting an on-demand webinar on “Time Collection for your Mobile, Field, Remote Workforce,” presented by Mr. Mark Nickson, president of Telliris. This webinar is ideal for all payroll and HR professionals who want to improve time and labor collection processes for remote and field employees.

Speaker, Mr. Mark Nickson has an extensive background in the industry, and he is a recent speaker at the American Payroll Association's Leadership Conference and Best Practices Forum. Mr. Nickson will discuss how to effectively track time, labor, projects, billing, and more using interactive voice reponse (IVR) technology.

As a payroll professional, you understand that your field, mobile, and remote employees do not have access to a computer, badge reader, or biometric reader to collect hours worked. IVR is a solution to help collect accurate information. IVR is telephone technology that allows a computer to detect voice and touch tones using any telephone, including a cellular phone.

Used to optimize your workforce management, telephone-based time collection lowers cost and reduces the workload of valuable resources by making it a field task. The telephone can validate hours worked in real-time, as well as track specific and billable projects. The data can be easily sent to your time and attendance or workforce management solution at the same time it is sent to your accounting department for billing. Billing is no longer dictated by the pay period, so accounting can bill customers on its own schedule and increase cash flow. To get more information on IVR technology, listen to our webinar, “Time Collection for your Mobile, Field, Remote Workforce.”

When: On-demand to meet your schedule

Where: At your desk

Who Should Attend: Professionals in payroll, human resources, IT, and finance

“IVR technology is a valuable and cost-effective solution for organizations with remote employees,” said CEO & President Kevin Choksi, WorkForce Software. “This informative session on IVR technology is a first-rate addition to our ‘Learning Series’ webinars, and we are proud to offer industry professionals this useful information.”

View this presentation before September 28, 2007, and you will be entered into a drawing to win a copy of the BLR Special Report on FLSA Overtime: Making Your Way Through the Exempt/Nonexempt Minefield.

About WorkForce Software

WorkForce Software, Inc. is a leader in workforce management systems for mid-sized and large employers. Its EmpCenter system automates and streamlines interactions between the employer and its workforce. Interactions include time entry, time-off requests, request for personal information, and schedule preferences. By automating these interactions, organizations can better manage payroll and processing costs, help ensure compliance with state and federal regulations, and increase the productivity and satisfaction of their employees. The EmpCenter suite is composed of numerous applications, including Time and Attendance, Activity Based Costing, Multiple Assignments, Accruals and Absence Manager, FMLA Manager, and WorkForce Reporting. WorkForce Software's diverse customer base includes large employers such as the University of California, the City of Raleigh, Vivendi Universal Games, and Compass Bank.
