

Support Packages

More Options. Greater Access.

With your workforce management system, you'll need a partner in crime by your side for every step of the journey. WorkForce Software® is ready to assist with an enhanced lineup of customer support plans to give you even greater access, convenience, and responsiveness from our highly trained support analysts from around the globe.

Regardless of the support plan you choose, you can expect no less than an experienced and knowledgeable staff dedicated to your organization because at WorkForce Software, we value your partnership. You can call or contact us on any number of reasons including questions on:

- Calculations
- User roles
- Access rights
- Terminal functions
- System performance
- ...and much more.

With an average of over a decade of IT experience and strong technical and business training, our army of support analysts will be prepared to handle any type of challenge. Additionally, Customer Support interacts daily with our Project and Account Management teams ensuring transparent communications and hastening the discovery and resolution of even the slightest concerns.

Our support plans guarantee a team that sets a high bar for responsiveness and consistently exceeds it. You'll also receive personal attention and service from start to finish. The first step in any service ticket is a human review by one of our Queue Managers. WorkForce Software offers certification for customers to ensure every call gets quickly resolved whether you choose standard or premium support.

Strategic Reviews

We prioritize taking the time to understand your organization so we can strategically leverage your business goals and provide recommendations tailored to your needs. In formal reviews your account team will explore new ways for your organization to take advantage of your WorkForce Suite investment, investigate ticket patterns and resolutions and have a broad-based discussion of forward-looking goals. With our additional consultative offerings, we provide Health Checks and Gap Analysis packages to enable your team to move swiftly and confidently when making future configuration changes.

Extra Perks and Benefits

Our enhanced customer support packages also reward you with discounts on valuable services including a growing library of additional training courses. These support packages are available through Standard and Premium support plans. Key elements of each package are outlined below:
