

THE MANUFACTURING Deskless Worker

of manufacturing leaders listed retaining quality workers among their top issues¹

Who are these deskless workers?

Manufacturing

Known as: Production, Shop Floor, Frontline

9.1m U.S. Manufacturing Workers²

These workers make, build, and assemble the things we use every day. They are on their feet and operating machinery, physically working side-by-side with peers and some of the most sophisticated technology in the history of manufacturing.

What They Value

- Being respected and included
- Flexible scheduling
- Safe work environment

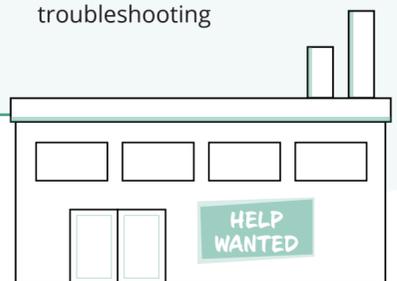

Industry Impacts

- Production quotas
- Lack of upskilling
- Division between management and workers

Engagement Motivators

- Two-way communication and input
- Safety and emergency protocols
- Easy access SOPs and troubleshooting

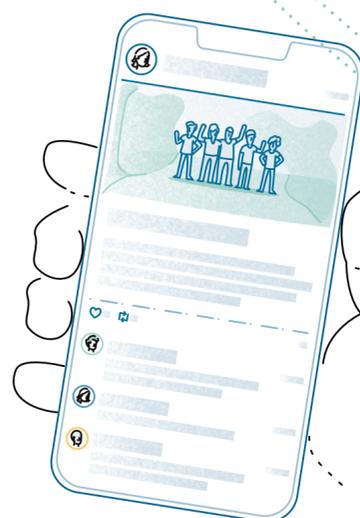

Despite a record level of new hires, job openings in the industry are still hovering near all-time highs³ at **800k**

Make Work Easy for Every Employee, Every Day, and Everywhere Work Happens

Manufacturers are likely to emphasize reskilling strategies, including continuous training to upskill the workforce, investment in startups to access new technology and talent, and collaboration with academic ecosystems to access digital skills.³ Modern workforce management technology provides your employees with the digital tools they need to do their jobs better, when and where they need them.

You have a vision for how your manufacturing operations should run, but do your employees have the tools to make it happen? WorkForce Software delivers modern workforce management solutions integrated with employee communications that are informed by data analytics and in the flow of work. Your workers will spend more time producing and delivering products to meet customer demand with confidence, compliance, and agility.
